## OPERATING AND FINANCIAL REVIEW

### Highlights during and subsequent to the half year

- GBM’s main focus is on its 100% owned Drummond Basin portfolio, including Twin Hills and Yandan projects, which collectively host **Mineral Resources (“MRE”) of 1.84 million ounces of gold**.
- Successful Stage 1 drilling campaign at Twin Hills (309 and Lone Sister deposits) materially enhanced the geological and mineralisation model with numerous drill holes intersecting **broad, high-grade mineralisation outside of the existing MRE** (~1.0Moz).
- Significant results from Stage 1 drilling included:
  - 309 Deposit*
    - **37m @ 5.00g/t Au** from 225m (TNDH012) including:
      - **3m @ 29.96g/t Au from 251m**
    - **29m @ 3.13g/t Au** from 194m (TNDH010) including:
      - **4m @ 15.11g/t Au** from 195m.
    - **29m @ 2.63g/t Au** from 302m (TNDH004) including:
      - **3m @ 16.56g/t Au** from 307m
  - Lone Sister Deposit*
    - **89m @ 1.28g/t Au** from 189m (LSHD002);
    - **52m @ 2.77g/t Au** from 299m (LSHD002) including:
      - **5m @ 7.68g/t Au** from 337m in (LSDH002).
- Stage 2 drilling campaign commenced, comprising a multi-phased 50,000m program consisting of approximately 20,000m of reverse circulation (“RC”) and 30,000m of diamond drilling (“DD”).
- Non-core asset divestment strategy achieved via the completion of the sale of the Company’s White Dam Project to Pacgold Limited (ASX: PGO), Cloncurry Project to Evolution Mining Limited (ASX: EVN) and Mt Morgan Project to Lithium Energy Limited (ASX: LEL).
- Placement to both new and existing domestic and offshore institutional and sophisticated investors to raise gross proceeds of A\$40m.
- Consolidated full ownership of the Mt Coolon Gold Project (“MCGP”) in Queensland, significantly strengthening the Company’s landholding position within the highly prospective Drummond Basin.

### OPERATING AND FINANCIAL REVIEW (Continued)

#### Twin Hills Stage 1 Drilling - 309 and Lone Sister

In late 2025, the Company commenced an initial drilling campaign at Twin Hills, designed to expand the existing mineral resource base and increase the understanding of both the geology and controls on the high-grade mineralisation at the 309 and Lone Sister deposits. An impressive **12.0%** of all drilled and assayed meters at 309 and Lone Sister intersected mineralisation above cut-off grade.

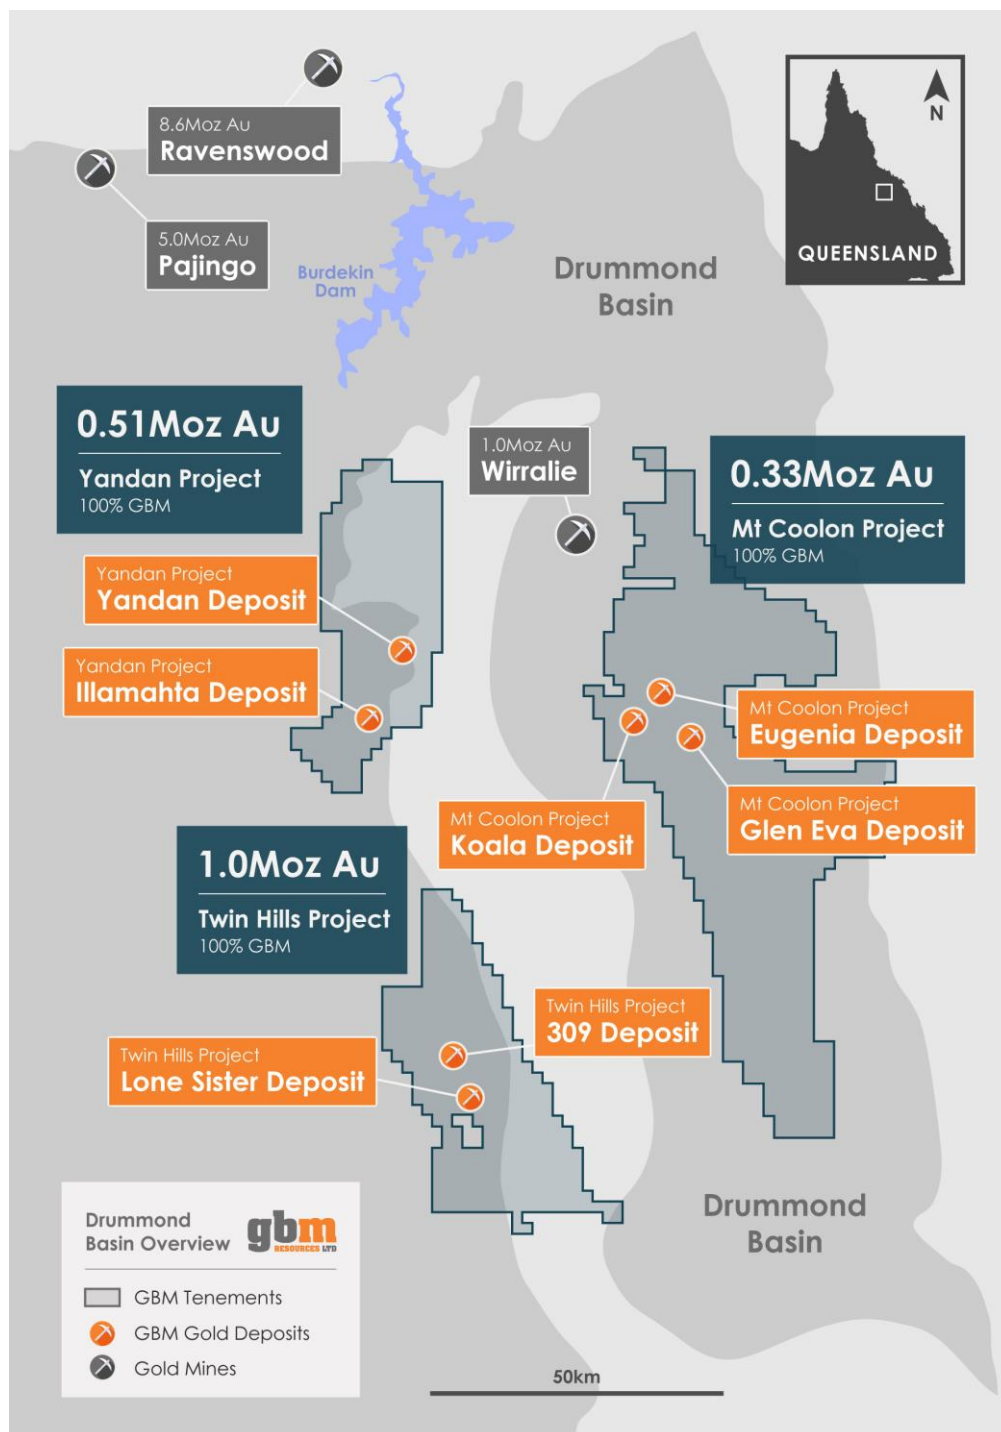

Figure 1 – Drummond Basin Portfolio.

## DIRECTORS' REPORT (Continued)

### 309 Deposit

At 309, Stage 1 drilling results have **proven continuity of high-grade mineralised zones outside of the existing MRE** of 10.6Mt @ 1.5g/t Au for 0.52Moz (open pit & underground combined), highlighting the substantial upside potential of the deposit.

Significant assay results from Stage 1 drilling at 309 included:

- **37m @ 5.00g/t Au** from 225m (TNDH012 – Figure 2) (**more than 100m outside of the existing MRE**) including:
  - **3m @ 29.96g/t Au** from 251m.
- **29m @ 3.13g/t Au** from 194m (TNDH010 – Figure 3) including:
  - **4m @ 15.11g/t Au** from 195m including:
  - **1m @ 49.87g/t Au** from 196m
- **29m @ 2.63g/t Au** from 302m (TNDH004 – Figure 3) including:
  - **3m @ 16.56g/t Au** from 307m
- **13m @ 2.14g/t Au** from 373m (TNDH003) including:
  - **5m @ 3.43g/t Au** from 379m

### Lone Sister

Stage 1 holes drilled at Lone Sister (MRE of 12.4Mt @ 1.2g/t Au for 0.48Moz) comprised two mineralisation extension holes outside of the MRE and one metallurgical/multi-target drillhole. The program successfully aimed to provide infill and testing of lateral and the down-plunge extension of high-grade mineralisation hosted within a rhyolite dome and its associated breccia complex.

LSDH002 was drilled in a south to north orientation and aimed to intersect infill mineralisation, provide material for metallurgical test work comprising various grades and oxidation states and also test an interpreted Mineralised East-West structure with high-grade gold mineralisation. Significant assays results (Figure 4) included:

- **14m @ 1.19g/t Au** from 60m:
- **89m @ 1.28g/t Au** from 189m:
- **52m @ 2.77g/t Au** from 299m including:
  - **3.2m @ 15.36g/t Au** from 300m
  - **2m @ 11.21g/t Au** from 329m
  - **4m @ 9.23g/t Au** from 338m.

The results lay within a broader zone of **181.7m @ 1.55g/t Au** from 189m and contains a peak gold interval of **1.0m @ 43.04g/t Au** from 300m which also lies outside of the existing MRE.

(Continued)

**Twin Hills Stage 2 Drilling - 309 and Lone Sister**

Subsequent to the end of the period, the Company commenced a significant multi-rig Stage 2 drilling program at the Twin Hills. The Stage 2 program builds upon outstanding results from the Company's Stage 1 program and comprises a multi-phased 50,000m drilling program consisting of approximately 20,000m of RC and 30,000m of DD, designed to target resource growth and demonstrate high-grade continuity, significantly increase the current MRE, primarily within the upper section of the mineralisation (likely open pit), explore for high-grade ore shoots and locate primary hydrothermal fluid pathways at depth (likely underground); and increase confidence in the upper section of the mineralisation to allow for future feasibility studies.

### Corporate

#### Non-Core Asset Divestments

##### *White Dam*

During the period, the Company completed the Share Sale and Purchase Agreement with Pacgold Limited (ASX: PGO) whereby Pacgold acquired 100% of the issued capital of the Company's wholly owned subsidiary, Millstream Resources Pty Ltd, the 100% beneficial and legal holder of the White Dam Gold-Copper Heap Leach Project ("White Dam"), for the following consideration:

- A\$1,200,000 in cash;
- 15,000,000 fully paid ordinary shares in Pacgold; and
- A deferred payment of A\$2,200,000 payable in cash or shares (at Pacgold's election) upon commercial production of at least 5,000oz of gold from White Dam.

The 15,000,000 fully paid ordinary shares in Pacgold are subject to a 12 month voluntary escrow. The share consideration allows for the Company to retain upside exposure to the potential of both White Dam and Pacgold's other existing gold and antimony assets.

##### *Cloncurry*

Subsequent to period end, the Company advised that it had entered and completed an agreement with a subsidiary of Evolution Mining Limited (ASX: EVN) for the sale of the Company's Cloncurry project ("Cloncurry") in Queensland. Consideration comprised a cash payment of A\$500,000 and a net smelter royalty of up to 2% on tenements at Cloncurry, allowing the Company to retain upside exposure to the project.

#### Placement

During the period, the Company announced that it had successfully secured commitments from both new and existing domestic and offshore institutional and sophisticated investors to subscribe for approx. 752 million new fully paid ordinary shares to raise gross proceeds of A\$40m before costs ("Placement").

The Placement was led by the Company's largest shareholder, Wise Walkers Limited, who subscribed for A\$8.0 million of the Placement. Significant support was also received from existing investors, alongside new institutional investors which has further strengthened and diversified the Company's shareholder base.

Canaccord Genuity (Australia) Limited acted as Lead Manager and Bookrunner to the Placement with Argonaut Securities Pty Ltd as Co-Lead Manager.

### Results of Operations

The net loss of the Group for the half year ended 31 December 2025 was \$9,504,561 (31 December 2024: \$552,829). This loss is predominately attributable to the following notable items:

- (i) Gain on sale of exploration and evaluation assets and other revenue of \$980,051 (31 December 2024: \$104,388), which in the current period is predominately attributable to the Group's sale of its Mt Morgan Copper-Gold Project in Queensland;
- (ii) Finance expenses of \$3,445,313 (31 December 2024: \$227,095) which in the current period is predominately attributable to early redemption fees paid on the convertible notes of \$2,961,945;
- (iii) non-cash share based payments expenses of \$2,568,184 (31 December 2024: \$8,082) which is attributable to the Group's accounting policy of expensing the value of shares, incentive options and rights (estimated using an appropriate pricing model) granted to key employees, consultants and advisors. The value of securities is measured at grant date and recognised over the period during which the security holders become unconditionally entitled to the incentive securities; and
- (iv) Loss from discontinued operations relating to the Group's subsidiaries which owned the White Dam Project in South Australia of \$3,451,534 during the period (31 December 2024: gain \$699,908). The loss in the current period includes an amount of \$2,637,716 relating to the sale of White Dam to Pacgold Limited (ASX: PGO).

*(iv) Changes to the Constitution*

### (c) Unlisted Option Pricing Model

The fair value of Unlisted Options granted is estimated as at the date of grant using the Black-Scholes option valuation model taking into account the terms and conditions upon which the Unlisted Options were granted.

During the half-year ended 31 December 2025, following shareholder approval, the Company issued 275,000,000 unlisted incentive options (Series 1-4 (inclusive) to Directors, key management, employees and consultants as part of their ongoing remuneration arrangements that had been provisionally valued and expensed as at 30 June 2025. A true-up of the valuation and expense occurred during the current period, utilising the below Black Scholes Option Pricing model inputs:

**Notes:**

- 1 The dividend yield reflects the assumption that the current dividend payout will remain unchanged.
- 2 The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which may not necessarily be the actual outcome.
- 3 The expected life of the options is based on the expiry date of the options as there is limited track record of the early exercise of options.

Our responsibilities are further described in the *Auditor's responsibilities for the review of the financial report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

## Auditor's responsibilities for the review of the financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2025 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
